

Partition granularity  
(e.g., classes)

**Boundary of  
Security  
Sensitivity**

```
class security {  
  process()  
}
```

```
class secHelper {  
  encrypt(Byte[]);  
  send(); }  
-----
```

```
class logger {  
  log(String);  
}
```

**Boundary of  
Partition**

**Untrusted class**
